

# *Greyhound Rescue of New York*

## March 2017 Newsletter

Hello GRoNY members. It's been a little while since we chatted, but spring is in the air, at least for a few days in temperatures, the sun is bright and how wonderful that the days are getting longer.

Spring break is different for everyone. Some go on vacation, I enjoy seeing the snow melt that reveals brown grass and wonder where those leaves came from because I know we raked before snow fell. Mostly as a greyhound owner and foster Mom, I have one goal in mind, clean the poop yard, and as that task is being accomplished, hopefully the greyhounds get fresh air, play and get tired, because we all will need to rest afterwards.

At our recent board meeting, the directors were brain storming about many upcoming events and items. I made a memory note to check my car glove compartment for updated shot records for our greyhounds. Due to traveling to different states for greyhound events, we photo copy our hounds records (I,e, rabies etc, and their medicines) and keep a copy tucked in the glove compartment. I like the visual hand copy, having a picture on your phone would be another way also; although I would need to scroll thru too many photos to locate it. So as a suggestion, why not put copy your greyhounds' shot record for your car. The directors also are again beginning to plan the annual picnic for Saturday July 8 and more details will be forth coming. There are a few events which have not yet been confirmed however GRoNY is looking towards a busy spring, summer and fall, and mixed that with the awareness clinics.

Speaking of clinics GRoNY is now at both the Healthy Pet Center in Latham and Saratoga PetSmart, on the same day for the awareness clinic at the end of the month GRoNY continue our second Saturday of the month clinic at Clifton Park PetSmart. All the information and maps are available on our website. With all the upcoming events or should the need arise for GRoNY to change the schedule, always check the website before heading out to visit.

Da Ja Roooooo, it been nice chatting with you again. Remember to hug you hound, and as you pet them, check for those nasty ticks which have been hiding in the brown grass, also check yourself also. Until next time
